## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-12 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1, which include, an electrowetting module having a fluid chamber containing two bodies separated by interface, a first body having a first conducting or polar fluid and a second body having a second non-conducting or non-polar fluid and first fluid body being insoluble in or immiscible with the second fluid body and amounts of compounds being sufficient for lowering the freezing point of the respective fluids to below  $-20^{\circ}\text{C}$ .
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
